# Maruyama Commercial Brushcutters Specifications/Features

## Features:

- Extreme - Duty Maruyama commercial engine delivers superior power and torque.
- Bearing supported chrome - moly crankshaft.
- Chrome impregnated aluminum cylinder.
- Dual ring piston.
- Metal engine stand.
- Oversized top fill fuel tank.
- Bull horn handles & throttle.
- Swivel shaft for easy use on all sorts of terrain (BCF42004).
- The solid steel driveshaft is bronze bushing supported the length of the shaft to reduce vibration and threaded at the clutch end to reduce damaging "play".
- Heavy-duty chrome-moly elliptical cut gears are fully supported by 4 high speed ball bearings.
- High and low frequency anti-vibration mounts.
- Strong, light structural aluminum outer tube.

## Power:

From top to toe Maruyama dedicated brushcutters are designed for serious labor. From the muscle of a Maruyama AE420 engine boasting nearly 2 torque horsepower to a heavy duty gearbox that's made specifically to handle the load, a Maruyama brushcutter is more than a match to the extreme conditions of real commercial use.
