Maruyama Commercial Edgers Specifications/Features

Features:

- Heavy-duty, high torque Maruyama commercial engines are up to even most challenging soil types.
- Bearing supported chrome - moly crankshaft.
- Chrome impregnated aluminum cylinder.
- Dual ring piston.
- Superior bi-directional design, flexible steel core inner driveshaft.
- Commercial-grade, high load, gearbox.
- High visibility shield allows greater control.
- Simple, tool-free depth adjustment.
- Over-sized nylon guide wheel.
- Durable, long lasting heavy-duty blade.
- High and low frequency anti-vibration mounts.
- Strong, light structural aluminum outer tube.

Control:

Maruyama stick edgers are extremely rugged, extremely powerful and way more maneuverable than a walk behind. So go ahead, take on curves, side hills, planting beds of unusual shapes; take on that tough, hard baked soil... go ahead take control. A Maruyama edger makes it easy.
