Redmax Trimmer Specifications

- Select trimmers that utilize the patented Strato-Charged engine technology also include the renowned Max Accelerator Pump.
- The MaxStart system is included with select models and eliminated recoil pulling for smoother operation and reduced user fatigue.
- Blades are adaptable on select models, allowing users to modify a trimmer's cutting capacity to specific conditions in the field, such as tall grass, heavy weeds, pasture, heavy brush or saplings.
- Large rubber front loop handles provide comfort and unsurpassed control.

MaxAccelerator Pump-MaxSpeed Acceleration

- Exclusive engineering and design.
- Provides faster starts, even from a cold start.
- Meets all current C.A.R.B. and EPA regulations.
- Utilize energy developed by pressure changes in the strato-airhead intake system.
- Pressure changes drive the MaxAccelerator and enrich the mixture only during the transition from idle to "full throttle".
- Unique to the reed-valve Strato-Charged **green and clean** engine.
- Simple design, construction and operation.
- No maintenance required.

MaxFlex Trigger
 Indestructible by design
