

Turbine Blower **4000**_{series} ET200

The Ventrac ET200 makes quick work of any clean up job. The **Turbine Blower** is designed to blow large volumes of air, and is much quieter than a conventional leaf blower. The ET200 can be used to blow leaves, light snow, and remove debris from sidewalks, parking lots and other areas.

The ET200 Turbine Blower's powerful front discharge nozzle can be hydraulically rotated 360 degrees from the comfort of the operator's seat. The dual action front bumper/deflector protects the nozzle from damage. When the nozzle is pointed downward the deflector bars on the bumper direct the airflow forward, clearing a path directly in front of the tractor.

Power and control allow you to move through your clean up work simply, quietly, and efficiently. The Ventrac Minute Mount System allows you to get attached quickly, and move on to the next job.

Standard Features:

- 10,750 Cubic Feet/Min (304 Cubic Meters/Min)
High Volume Air Flow
- Reduced Noise Level
- Nozzle Rotation controlled hydraulically from the tractor seat.
- 360 degree nozzle rotation
- Built-In Deflector/Bumper
- Ventrac Minute Mount System
